ABOUT QUIET EARTH MOSS

Quiet Earth Organically Preserved Moss Walls help reconnect humans to the natural world by bringing naturally preserved plant decor indoors. It is 100% natural moss, preserved by replacing the water in the plant with glycerine. This is an eco-friendly way of doing so because it requires only natural oils and food dye. There are 5 types of moss, offered in various color options but the most common is GREEN!

What can you do with this moss? You can order any type in a variety of product styles including wall panels, ceiling baffles, 3D structures, letters, tiles, planters, and more.

The QEM team partners directly with architects, designers, business owners, and consumers to bring their vision to life through texture, color, and shape. Quiet Earth Preserved Moss Walls are entirely made by hand to enhance your design and ensure top-quality installations.
